PERSONNEL AERIAL-WORK PLATFORM

AWP14 Double-Mast Platform

A higher-capacity double-mast personnel platform for work at height, subject to strict setup and operating controls.

14 m	200 kg	Double mast	Personnel
PLATFORM LIFT HEIGHT	RATED LOAD	CONFIGURATION	PLATFORM TYPE

Appropriate applications

- Higher-level indoor maintenance and installation
- Personnel access where floor and clearance suit the machine
- Applications within the platform and configuration limits

Site and operating controls

- Fully deploy and verify all stabilisers
- Confirm surface level, bearing and overhead clearance
- Observe wind and weather restrictions
- Complete inspections; keep emergency descent available
- Trained and authorised operator

14 m IS PLATFORM HEIGHT

Do not present platform height as working height. The platform load includes people, tools and materials; verify the supplied machine data plate.

Availability and next step

Available for sale and rental, subject to configuration and availability. Send task, access, floor, height, location and dates.

Documentation note

Headline values are based on the reviewed aluminium-alloy aerial-work-platform manual for the confirmed AWP14 launch model. Publish manufacturer documents only after model matching and review.

This summary does not replace the supplied manual, machine data plate, site risk assessment, applicable legislation or competent supervision. Manufacturer declarations or CE documents do not by themselves constitute South African approval. Refer to the South African Driven Machinery Regulations and obtain appropriate professional guidance for the application.
